

## **BLACKBERRY SETUP**

1. Open the email from Gofinder. *NB. The email should be sent to a separate hotmail, gmail or yahoo address to prevent unwanted alerts spamming your regular inbox*
  2. Select the link and it will automatically open in the browser
  3. Select Download – Downloading Tracker will pop up
  4. Would you like to grant Watcher Trusted Application Status? Select Yes
  5. Go to the Downloads folder (A folder with a yellow arrow coming from the right) in Menu
  6. Select Myspot
  7. Grant Myspot Trusted Application Status
  8. Email your Pin and Registration Key to Gofinder
  9. You will be emailed back a private key to enter in the phone
  10. Press the select button on the Myspot screen and select 'Add Private Key'
  11. Once Private Key is entered, with Myspot open, press the menu icon and scroll down to settings. Select the Hotmail, Gmail or Yahoo address in the email section
  12. Setup complete
- 
- ❖ To move the Myspot Icons out of downloads, highlight the icon, press the menu button and select move to folder and select Home. You may then move it around as you wish.
  - ❖ To test your phone GPS, go to Menu → Options → Advanced Options → GPS → Menu Button → Refresh GPS
  - ❖ To remove the email from your mass messages app: Open messages → Menu Button → Options → Main Message List Settings → Uncheck the Hotmail, Gmail or Yahoo option → Save
